Professional Summary

Senior Mobile Application Developer with **6+ years of experience** specializing in Flutter, native Android, and scalable cross-platform architectures. Expert in building high-performance apps, leading development teams, managing end-to-end delivery, and publishing 30+ apps to the App Store & Google Play Store. Skilled in clean and modular architecture, offline-first apps, API integrations, CI/CD, and system design. Passionate about user-focused solutions, mentoring developers, and adopting emerging technologies.

Core SKILLS

- **Flutter, Dart, Java, Kotlin, Native Android**
- **State Management:** BLoC, Provider, GetX
- **Architecture:** Clean Architecture, MVVM, MVC
- **App Deployment:** Play Store, App Store, TestFlight
- **Integrations:** REST APIs, Google Maps, Firebase, Crashlytics, Supabase, IAP, SQLite
- **Tools:** Git, Azure DevOps, Azure App Service, Fastlane, Performance Monitoring, CI/CD
- **Other Skills:** Team Leadership, Project Management, System Design, Requirements Analysis

EXPERIENCE

Senior Mobile Engineer, 07/2024 - Current

JustGo - Hybrid (Bangladesh Office / Remote)

- Led the design and implementation of a scalable Flutter clean architecture (BLoC) from scratch.
- Developed and integrated new features, optimizing app performance and enhancing user experience.
- Collaborated with product managers and UI/UX teams to convert designs into seamless, user-friendly applications.
- Managed app releases on App Store and Google Play Store, ensuring smooth updates, compliance, and app stability.
- Implemented local caching and supported Azure DevOps/Fastlane CI/CD for reliable app delivery.

Skills: Flutter · App Deployment · Unit and Integration Testing · Azure · Token Studio Integration · CI/CD

Senior Flutter Developer, 06/2023 - 06/2024

The Soft King - Dhaka, Bangladesh

- Managed app releases for 10+ apps on both App Store and Google Play Store.
- Led a team of 5 developers, successfully completing 7+ projects on time.
- Review code, implement features, and improve internal architecture.
- Create plans, coordinate UI/UX & backend teams, and ensure timely delivery.
- Analyze trends, define requirements, and design product roadmaps.

Skills: Flutter · Leadership · Team Management · Project Management · App Deployment & Store Management · Requirements Analysis · Customer Support

Flutter Developer, 02/2022 - 05/2023

The Soft King - Dhaka, Bangladesh

- Developed internal architecture to uphold code quality and enhance seamless collaboration within the team.
- Review team code, taking ownership of projects, and actively collaborating with backend developers and UI-UX designers.
- Skillfully handled diverse mobile services: Google Maps, SMS Gateway(In Native Android), localization, Firebase real-time databases, advanced animations, storage management, and REST API integration.
- Optimized app performance using GetX, Dependency Injection, and design patterns (MVC, MVVM).

Skills: Flutter · Dart · Getx · Native Android · FCM · Dependency Injection · Design Pattern · Git · Google Map Integration · Localization · Firebase

Flutter Trainer, 09/2021 – 12/2021 (part-time)

ICT Division - Chittagong, Bangladesh

- Develops and executes training plans, training materials, and classes, schedules classes into facilities, and provides software instruction to the students.

- Evaluated trainee progress and feedback to improve course content, teaching OOP, Flutter widgets, animations, and core concepts, while also providing guidance on soft skills.

Skills: Soft Skills · Mentoring · Object-Oriented Programming (OOP) · Flutter · Dart

Android Developer, 11/2020 – 01/2022

MiniPOS - Chittagong, Bangladesh

- Developed MiniPOS, a portable billing system used by over 50+ organizations, including Save the Children.
- Worked on inventory management, restaurant management, and courier tracking systems.
- Integrated POS devices, Bluetooth printers, and Jitsi Meet SDK for video conferencing.

Skills: Java · SQLite · REST APIs · Retrofit2 · Android · Jitsi SDK · POS Devices Integration

Android Developer, 06/2020 – 10/2020

Spinner Tech – Remote

- Developed e-commerce applications with a focus on user-friendly experiences.
- Implemented Material Design and XML for mobile app UI design.
- Integrated SQLite for local data storage and REST APIs for backend communication.

Skills: Java · REST APIs · XML · Android · SQLite · Material Design

Projects

- **JustGoAdmin Tools:** A Flutter app designed for admins to manage classes and events effortlessly with secure MFA, QR attendance scanning, real-time tracking, and customizable settings. Built to optimize workflows for clubs and organizations.
  IOS: *App Store Link*
  Android: Google Play Store Link

- **Belyfted Remit:** A secure and swift remittance mobile app built with Flutter, featuring easy money transfer, beneficiary management, robust security (KYC and 2FA), receipt downloads, Firebase push notifications, and more.
  IOS: ***App Store Link***
